

Automatic Button Feeding and Attaching Machine TS-438D-SK

TS-438D video

Advantage

1. High efficient: Comparison common button attaching machine efficiency higher 2-3 times. Achieved high efficiency easy sewing.
2. High speed: Easily change the button and finish the debugging within few minutes
3. Intelligent: With mistake point out and give solution, button attaching speed can adjustable.
4. Universal property: This device can match any kind of computer button attaching machine

Specifications:

Sewing method:	Single needle sewing
Sewing speed:	Max speed 2700rpm
Kind of welts	Parallel double welt, parallel single welt (with flap, without flap)
Stitch length	Standard 2.5mm (2.0mm~ 3.4mm)
Sewing length (fastening stitching)	Condensation stitching: Standard 1.0mm (0.5- 1.5mm)
	Back -tack stitching: Standard 2.0mm (0.5 ~ 3.0mm)
	Changeable between condensation and back -tack stitching
Corner -knife cutting adjusting method	Mechanical adjustment
