

Automatic Button Indexer TS-206

TS-206

Advantages

1. Suitable for both men and women's shirts.
2. The buttons distance and quantity are easily adjustable in the control system.
3. Laser positioning function to ensure accurate position for each button.
4. Button size auto detecting. Finish all the button attach jobs automatically.
5. Bobbin thread consumption detect function. It can help to reduce the loose caused by bobbin thread use up, which is difficult to find.
6. Auto fabric feeding and auto stacking functions can greatly cut down workload, so one operator can run 2-3 machines at the same time.
