

Automatic Cuff Rib Machine TS-F158

TS-F158

Advantages

1. No professional skills needed; all garment processing parameters are set directly on the panel for easy operation.
2. High-precision automated control covers sewing, cutting, and collecting, ensuring efficient and stable production.
3. Intelligent functions like thread counting and auto-stop alerts help reduce material waste from the source.
4. Quick knob adjustment lets you switch cuff and leg hem specs easily for multi-category production.
5. The built-in fault display enables fast problem location, simplifying troubleshooting and maintenance.
6. Compact footprint allows one operator to manage multiple machines, cutting both labor and site costs

Specifications

Model	TS-F158
Highest sewing speed	3000sti/min
Stitch	Single-needle lockstitch
Needle model	DBX1 (#14)
Rib fabric size range	Perimeter:120-250mm Length:85-140mm
Hemming size range	8-12mm
Seam allowance	1-2mm
Productivity	6s/pcs
