

Automatic Elastic Band Joint Machine TS-166 -C

TS-166-C

Advantages

1. Built with industrial IoT to enable remote data and system updates.
2. Supports remote parameter adjustment and cloud-based after-sales maintenance.
3. Real-time machine data and status monitoring via mobile APP.
4. Equipped with imported SMC parts for stable and durable performance.
5. Accurate logo positioning and infrared heating feeding for better quality.
6. Automatic alarm for thread breakage and bobbin thread shortage.
7. Intelligent length control with an error within 2 millimeters.
8. Automatic material collecting and elastic joint detecting function.

Application

The automatic band joint machine is widely used on sportswear, underwear, cap, medical band etc

Specifications:

Machine Model	Pattern Sewing F-720
Cutting Tool	Knife/Ultrasonic
Elastic Width	1-8CM
Elastic Length	20-300CM
Option	Camera / location device
