

Automatic Rib Bottom Coverstitch Hemmer TS-852

TS-852

Advantages

1. Automatic double rectifying device paired with a front rectifying device ensures fabric edge auto-positioning is both stable and highly sensitive.
2. One-key size switching enables quick, hassle-free adjustments to meet different sewing specifications.
3. Built-in broken thread detection helps prevent sewing defects and reduces unnecessary downtime.
4. Automatic trimming streamlines operations and delivers consistently neat thread ends.
5. Integrated discarded ends collection keeps the work area clean and well-organized.
6. High-precision, stable operation improves sewing consistency and boosts overall production efficiency.
7. User-friendly control panel allows for intuitive operation and quick parameter setup.

Specifications

Model	TS-852
Voltage	220V
Air Pressure	6KG
Gas consumption	150L/min
Size Range	Stretchable diameter range available 38-80cm
Measurement (N.S.)	147*114*151CM
Production Capacity (per hour)	200-250pcs
Power	1000W
