

## Automatic clothes folding & packing machine TS-FPS-FA

TS-FPS-FA

### Advantages

- 1.Compact footprint with fully automatic folding, packing and sealing in one machine.
- 2.Both folding width and length are fully adjustable for various product specifications.
- 3.Supports both single-pack and multi-pack modes to meet different production needs.
- 4.Equipped with a touch screen for real-time parameter display and easy adjustment.
- 5.Offers three sealing options: tear sticker, two-tape, and heat-cut for versatile packaging.
- 6.Automates the entire process to boost production efficiency with consistent, reliable performance.
- 7.Delivers standardized folding and packaging results that outperform manual labor.
- 8.Built with a robust industrial structure for long-term, low-maintenance continuous operation.

### Specifications

|                |                                                               |
|----------------|---------------------------------------------------------------|
| Model          | TS-FPS-FA                                                     |
| Operation mode | Automatic folding , packing and sealing                       |
| Sealing method | Three options for sealing: tear sticker/ two-tape/heat-cut    |
| Packing speed  | 460pcs/h                                                      |
| Air pressure   | 0.6Mpa                                                        |
| Voltage        | 220V/50HZ                                                     |
| Power          | 0.7KW                                                         |
| Application    | T-shirts, polo shirts, sweat shirts, pants,and thin coat, etc |
