

Automatic multifunction plastic button setting machine TS-198-E

TS-198-E video

Advantages

1. High efficiency: 100-110 pcs/minute.
2. The face button shape can be round (diameter 4 mm- 16mm), half-round, cup, cone, square and so on. The base button is pineapple nail.
3. It uses new vibration plate device, auto-feeding, solid riveting.
4. Riveting is accurate and tight. (the nail's cap can be bigger or smaller, leg can be shorter or longer, does not matter.)
5. The working speed, degree of tightness and brightness can be adjusted.
6. The machine widely uses in clothing, shoes and hats, suit case and leather goods, waist band scarf, curtain, bed net, decoration, art and craft goods, and so on.
