

Double head elastic joining machine TS-166-D

TS-166-D

Advantages

1. The elastic joining machine equips double-head, it's more efficient.
2. The sewing process is ultrasonic bonding first, then sewing ,the interface is smoother.
3. Using imported SMC electrical accessories, the elastic joining machine runs faster and provides better stability and durability.
4. Logo positioning function, through the color positioning system, the elastic joining machine can accurately locate the position of single or multiple logos.

Product Specifications:

Machine head	Option: Bartack 1906 / Pattern sewing 2210 / JUKI 210EN
Highest sewing speed	2500RPM
Elastic width	1-8cm
Elastic length	15-110cm
