

High-speed feed-off-the-arm Chainstitch machine TS-927

TS-927

The bending needle is independent and easy to adjust. The needle moves forward and backward with the feeding teeth.

TS-927 is suitable for both thin and medium materials, such as shirts, sweater and casuals, and the longer needle gauge is more suitable for sewing nylon rain coat.

TS-927PL video

TS-927-PL

TS-927-PL is designed with built-in up-down plastic puller, which is anti-skid and wrinkle resistant, and the pulling fabric is more synchronous, so that the stitch is more flat and beautiful. It is suitable for sewing light materials, such as shirts, sweater and casuals, and nylon rain coat.

TS-927-PS

TS-927-PS is suitable for both thin and medium materials. Exterior equipment with up-down puller system makes the pulling fabric more smoothly. The stitch is more flat and the usability is flexible. It is suitable for sewing shirts, sweater, and the longer needle gauge is more suitable for sewing nylon rain coat.

TS-928

TS-928 is a kind of feed-off-the-arm 3-needle Chainstitch machine. The bending needle is independent and easy to adjust. It is suitable for sewing medium-thick materials, such as jacket, denim trousers, fatigue clothes and work trousers. The machine also can be changed to 2 needles machine.
