

## Three heads electromagnet snap button attaching machine TS-806M

TS-806M video

### Advantages

1. Its special design is one machine with three heads, which makes punching buttoning in top, and buttoning in bottom finish accordingly by changing the position of the tray three times.
2. The laser-positioning device can change the positioning point feely to control the button accurately, Meanwhile, the intelligent luminescence device can reduce eye-fatigue for workers, enhance work efficiency and save manpower.
3. The proper safety device protects workers and machine from getting hurt.
4. The foot-presser device set hands free to sew freely.

### Product Specifications:

Working pressure	Electromagnetic
Button attaching pressure	150-500kg
Button attaching frequency	32pcs/min
Distance upper and Lower	35mm
